

# STICHWORT- VERZEICHNIS

## ICD 10-Schlüssel in [ ..... ].

### Hinweis:

Bei Angabe von 2 ICD-Schlüsseln bedeutet die erste Ziffer die Ätiologie der Krankheit, die zweite Ziffer mit einem „\*“ ist der optionale Schlüssel für den Manifestationsort. (Siehe Internet: [www.icd-code.de/](http://www.icd-code.de/))

### DRGs = Diagnosis related groups:

Das Prinzip der DRG ist, alle Patienten mit gleichen Erkrankungen in eine Gruppe einzuteilen. Das Krankenhaus bekommt für jeden Patienten, der in eine bestimmte DRG gruppiert wird, den gleichen Betrag. Jede DRG ist einem Organsystem zugeordnet. Der erste Buchstabe der DRGs kennzeichnet das Organsystem. Die folgenden zwei Ziffern geben entweder die Art der Behandlung oder der Erkrankung an. Der letzte Buchstabe bezeichnet den Schweregrad von Krankheit oder Eingriff.
